

Annex 12 – Existing standard rules

Exemption	Potentially suitable standard rules currently available	Notes
U1 Use of waste in construction	https://www.gov.uk/government/publications/sr2015-no39-use-of-waste-in-a-deposit-for-recovery-operation	Standard rules were produced specifically to cover construction and reclamation activities as part of the 2010 Regulatory changes. Revisions were consulted on in 2014 and new standard rules Published in 2015. These rules specifically cover deposit for recovery operations that would no longer be carried on under the revised U1.
U16 Use of depolluted end of life vehicles	None that only deal with depolluted vehicles only https://www.gov.uk/government/publications/sr2015-no13-75kte-vehicle-storage-depollution-and-dismantling-authorized-treatment-facility https://www.gov.uk/government/publications/sr2015-no18-metal-recycling-vehicle-storage-depollution-and-dismantling-facility	Most vehicles under U16 are not depolluted and therefore non-compliant with U16. Therefore, it is unlikely that there is a genuine need for an additional standard rules only dealing with depolluted vehicle dismantling.
T4 Preparatory treatments (baling, sorting, shredding etc.)	https://www.gov.uk/government/publications/sr2015-no21-75kte-materials-recycling-facility https://www.gov.uk/government/publications/sr2015-no22-materials-recycling-facility-no-building	These standard rules are the most likely fit for treatment of typically recyclable wastes.
T6 Treatment of wood waste and waste plant matter by chipping, shredding, cutting or pulverising	https://www.gov.uk/government/publications/sr2015-no23-treatment-of-waste-wood-for-recovery	The current standard rules were developed specifically to cover treatment of wood waste and should be able to cover the majority of T6 operations that are likely to need a permit.
T8 Mechanical treatment of tyres	None that specifically deal with tyres only. https://www.gov.uk/government/publications/sr2015-no6-75kte-household-commercial-and-industrial-waste-transfer-station-with-treatment	

	https://www.gov.uk/government/publications/sr2015-no7-household-commercial-and-industrial-waste-transfer-station-with-treatment-no-building	<p>These rules allow no more than a total of 50 tonnes of intact and shredded waste vehicle tyres (waste codes 16 01 03 and 19 12 04) to be stored at the site.</p> <p>It is likely that a tyre only option will be needed.</p>
T9 Recovery of scrap metal	https://www.gov.uk/government/publications/sr2015-no16-metal-recycling-site https://www.gov.uk/government/publications/sr2015-no14-75kte-metal-recycling-site	<p>Most T9 operations will still be carried out under T9 and those that do not should be able to use existing standard rules.</p>
T12 Manual treatment of waste	<p>None that specifically deal with manual treatment of single waste streams</p> <p>https://www.gov.uk/government/publications/sr2015-no21-75kte-materials-recycling-facility</p> <p>https://www.gov.uk/government/publications/sr2015-no22-materials-recycling-facility-no-building</p> <p>https://www.gov.uk/government/publications/sr2015-no6-75kte-household-commercial-and-industrial-waste-transfer-station-with-treatment</p> <p>https://www.gov.uk/government/publications/sr2015-no7-household-commercial-and-industrial-waste-transfer-station-with-treatment-no-building</p>	<p>Some wastes are covered under materials recycling facility (clothes, textiles, pallets, footwear etc.)</p> <p>Some will be covered by waste transfer and treatment – mattresses, furniture (bulky waste), windows and doors.</p>
S1 storage of waste in a secure container	None specifically for storage only	
S2 Storage of waste in a secure place	None specifically for storage only	
D7 Burning waste in the open	None - Not required
